Iceland Figure 8 Fiber Optic Cable Multimode

Overview

Description Fiber optic figure 8 cable, multi-tube, APL, SM9/125, PE xxx, fiber count 004 / 006 / 008 / 012 / 024 / 036 / 048 / 072 / 096 / 144 This kind of cable use upper messenger wire to support aerial cabling. It is designed for places with heavy wind. Corning ALTOS® figure-8 gel-free cables are self-supporting aerial cables designed for easy and economical one-step installation. The loose tube design provides stable performance over a wide temperature range and is compatible with any telecommunications-grade optical fiber. Characterized by its unique “Figure 8” profile, this cable incorporates a steel stranded wire. Home / Products / Fiber / Fiber Commercial Enterprise Cables / Outdoor and Campus Cables / MX-Series – Figure-8 Messenger Cables Outdoor aerial installations along utility poles for cable television, telecom or other outside plant campus backbone applications without the need for cable lashingOptical fibres are housed in loose tubes that are made of high-modulus plastic and filled with water blocking yarns. The tubes (and fillers) are stranded around the central strength member to form a cable core. The core is covered by water blocking tape and armored with steel tape. Stranded steel. The fibers, 250µm, are positioned in a loose tube made of a high modulus plastic. Buy communication cables for your network from international suppliers.
