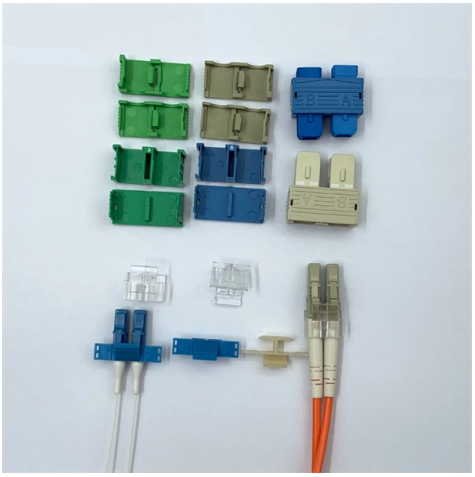
UK CIF PoE Switch 100G



Overview

The DIS-100G-10P is an industrial unmanaged switch equipped with eight 1G PoE ports and two SFP ports, providing plug-and-play simplicity for deployment. The SFP ports support long-range data transmission, removing the distance limitations of traditional Ethernet cabling. FS 100G Ethernet Switches with high speed and port density give you cost-effective options to incrementally upgrade and have flexible bandwidth across the existing infrastructure in entreprise campus network. FS 100 Gigabit data centre switches with build-in broadcom switch chip provides powerful hardware switching capacity and data centre features (supporting stacking, MLAG, PFC, ECN, VxLAN, EVPN, REUP, etc), making them ideal for cloud data centre and high-end campus network. 3af/at, delivering up to 30 W per port and simplifying installation 6kV surge protection keeps all Ethernet ports unharmed from the surge Corrosion-resistant steel casing and hardened components ensure reliable operation. A network switch is device that connects multiple computers or smart home accessories such as lights, heating, cameras or storage in the home; or for connecting PCs, workstations, servers, storage and IP-enabled security or surveillance devices within a business environment. Each scenario allows. The M4350-40X4C (XSM4344C-100NES) is a high-performance 1U Layer 3 managed switch purpose-built for AV-over-IP and enterprise core networks. It features 40 × 10G/Multi-Gig PoE++ ports (up to 90W per port) with a base PoE budget of 196W (expandable up to 1,676W via modular PSUs) and 4 × 100G QSFP28. Browse a wide selection of PoE switches from leading brands. Metal cases, fanless designs, and more.
