Is it okay to use fireproof putty when making cable trays

Overview

It is also safe for applications including synthetic cable jackets, making it suitable for firestopping cable bundles. FM011 Moldable Firestop Putty is an industry leading, one-part, flexible, intumescent putty ready-to-use for wall or floor openings containing cable trays, cable bundles, plastic pipes and/or conduits providing up to a 3-hour fire resistance rating. Formulated dark red, this easily moldable putty stick provides up to 4 hours of fire protection. It is designed as a joint filler and sealer for use in penetration seals. Fire Putty is listed in most environmental registers, which means that the product is not classified. Firestop Putty is very suitable for the following applications: No specific safety regulations apply and the goods are not classified as dangerous.
