UPS Outdoor Cabinet Specifications

Overview

UPS Battery Cabinet: Types, NEMA Ratings & Sizing GuideKDST's outdoor telecom cabinets and outdoor communication cabinet range are engineered for high-ambi.

Key Takeaways

Outdoor UPS cabinets are rugged, weatherproof enclosures designed to house UPS systems with IP55–IP65/NEMA3R–NEMA4 protection, supporting power capacities from 100W to 60 kVA for critical outdoor applications.

Enclosure and Environmental Protection

Outdoor UP

S cabinets are built to withstand harsh environments. Common features include: IP/NEMA Ratings: IP55, IP65, NEMA3R, or NEMA4 for dust, water, and weather resistance. Construction Materials: Marine-grade aluminum, stainless steel, or durable plastic for corrosion resistance and mechanical protection.

Temperature Range: Many cabinets operate from -40°C to +74°C, with derating above 55°C. Lightning and Surge Protection: Integrated protection against over-voltage, under-voltage, and short-circuit conditions.

Power Capacity and UPS Integration

Outdoor UP

S cabinets are designed to support a wide range of power requirements: Low-power solutions: Micro Secure 100 supports up to 100W with integral batteries providing 2+ hours of autonomy. Medium to high-power solutions: EdgePower cabinets range from 1–20 kVA, scalable up to 60 kVA for telecom, traffic, CCTV, and edge IT applications.

DC and A

C Options: Some models, like Edge Span U1000, offer DC versions for telecom and small cell backup.

Battery and Maintenance Features

Flexible Battery Space: Cabinets allow for scalable battery configurations to meet runtime requirements.

Maintenance-

Free Design: Certain models use natural heat dissipation without fans, reducing maintenance needs. Smart Monitoring: Some cabinets provide remote monitoring via 4G or Ethernet interfaces, reporting operational status to management platforms.

Mounting and Installation

Mounting Options: Wall, pole, or floor mounting depending on site requirements.

Plug-and-

Play Design: High power density and compact design facilitate quick installation. Integrated Breakers and Surge Suppressors: Protect both the UPS and connected equipment.

Applications

Outdoor UP

S cabinets are ideal for: Telecom base stations and small cellsTraffic control systemsCCTV and surveillance networksEdge IT infrastructure in remote or roadside locations. These specifications ensure that outdoor UPS cabinets provide reliable, continuous power in harsh environments, combining robust enclosures, flexible battery options, and integrated UPS electronics for critical infrastructure protection.
