Linear Constant Temperature Detector Terminal Box

Overview

Connection box and end-of-line for FT Linear Heat detector cable. Supplied with cable gland and terminal block. Digital Linear Heat Detector provides a very-early alarm detecting function to the protected environment, The detector can be known as an intelligent "switch" type detector. The polymers between the two conductors will break down at specific fixed temperature allowing the conductors contact, the. The SR-502 Series Junction Box Sealed Strain Relief Connector is used when the Protectowire Linear Heat Detector enters or exits the junction box. The Linear Heat. Micro Exploration Technology Cable Linear Temperature Sensing Fire Detector Terminal Box JTW-LD-WT-302 is an advanced fire detection solution designed for precise temperature monitoring over extended areas. Its main function is to balance the signal state of the LHD cable.

Linear Heat Detection Cable with Terminal Box

Digital Linear Heat Detector provides a very-early alarm detecting function to the protected environment, The detector can be known as an intelligent "switch" type

Junction Boxes and Feed Cable

Use as end-of-line box for CTM series modules. The SR-502 Series Junction Box Sealed Strain Relief Connector is used when the Protectowire Linear Heat

800 900 Series Linear Heat Detector (LHD)

Linear Heat Detection Cable is available in resettable and non-resettable technology. The non-resettable cable is described as Digital and the resettable as Analogue.

Micro Exploration Technology Cable Linear Temperature Sensing Fire ...

Enhance your fire detection system with Micro Exploration Technology Cable Linear Temperature Sensing Fire Detector Terminal Box JTW-LD-WT-302. Durable, easy to install, and compatible with

Vimpex Signaline SL-UCB Universal Connection Box

It can be used as an end of line enclosure, junction box or an interposing line unit. This all-in-one solution reduces on site time and cost. It uses heat rated

NMS1001-P Terminal Unit (EOL BOX)

The Terminal Box (terminal processor) is the control terminal of the product. The Terminal Box (terminal processor) is connected to the end of the LHD cable.

FyreLine Resettable Junction Box

It offers a secure, weatherproof enclosure, easy DIN rail mounting, versatile connectivity via five terminals, and secure terminal connections. The FyreLine

Connection box and end-of-line for FT Linear Heat detector cable

Connection box and end-of-line for FT Linear Heat detector cable. IP66. Dimensions: 94 x 94 x 54mm. Material: Polycarbonate. Supplied with cable gland and terminal block.

Linear Heat Detection: ProReact EN Analogue Junction

Our junction box is an optional component that allows you to connect different lengths of temperature sensing cable, if necessary. For example, to increase the

FirePlus-LHD Digital One or two zone digital LHD end-of-line box with ...

Two Cable Glands and 5 DIN Rail Mounted Terminal Blocks for use with linear heat detection cable as end-of-line box or in-line junction box (one or two zones). Includes testing of the operation of the

800 900 Series Linear Heat Detector (LHD)

800 900 Series Linear Heat Detector (LHD) System Sensor 800 series digital linear heat detector and 900 series analogue linear heat detector offer early detection of fire and overheating conditions in

Patol Analogue EOL Stainless Steel Termination Box

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

The 700-515 End of Line Junction Box in an attractive IP65 Stainless Steel finish has been designed to terminate cable on a Linear Heat Detection system.

End Of Line Terminators Linear Heat Detection Cable LHDC

The Patol End Of Line (EOL) junction boxes are designed to terminate either Resettable Analogue and Non-Resettable Digital LHDC. The EOL unit provides fault monitoring on the cable.

Constant Temperature and Humidity Box

Usage Overview: The constant temperature and humidity box has an accurate temperature and humidity control system. It provides various simulation environmental conditions required for industrial

Thermocable A1343 Linear Heat Detection Cable

Thermocable A1343 LHD Junction Box Thermocable A1343 Linear Heat Detection Cable Junction Box. With 5 DIN Rail mounted terminals & 2 cable glands.

Linear Heat Detectors | Protectowire

The CTI™ linear heat detector is a twisted pair of dissimilar spring conductors which are insulated with a heat-sensitive material. This material is designed to soften

Comparison of Linear Heat Detectors

2. Digital (Single Set Point, Fixed) Linear Heat Detectors A non-integrating Linear Heat Detector which consists of two actuators (wires) individually insulated in a heat sensitive material that melts at a

Datenblatt DB DE ...

1 Description The terminal is designed for use within an Inline sta-tion. This terminal provides an 8-channel input module with three linear resistance ranges for resistance tempera-ture detectors. The
