Which is more expensive electrical wire or fiber optic cable

Overview

Fiber optic cables are generally more expensive to install than copper cables due to the cost of the cables themselves and the specialized installation process. However, the higher initial cost can be offset by the lower maintenance costs and longer lifespan of fiber optic cable. Material Costs: Copper cables are cheaper than fiber optic cables, making them a seemingly attractive choice for businesses with limited budgets. In today's data-driven world, the backbone of any robust network is its. They are ideal for long-distance communication and high-speed internet, but they are more expensive to install. We'll give clear, accessible explanations (with example scenarios) to help you decide which suits your needs best.
