Low-voltage landscape distribution box

Overview

The low-voltage distribution box supports surface-mounted/flush-mounted installation, offering high safety performance. It integrates functions such as overload protection, short-circuit protection, leakage protection, metering, and intelligent control. CAHORS has a wide range of enclosures suited to your various network and connection configurations, and the modular versions are configurable to connection architectures. Branching block grids. This series of low-voltage cable junction boxes are used in power systems with a rated frequency of 50/60 Hz and a rated voltage of 380V (660V) for power distribution and control of power, lighting and power distribution equipment. It is suitable for outdoor public places such as various harsh. www. com/lowvoltage/catalogs Refer to the Industry Mall for current prices www. com/industrymall The products and systems listed in this catalog are developed and manufactured using a certified quality management system in accordance with DIN EN ISO 9001:2008. This electric power switchgear panel is designed for optimal performance in harsh environments, ensuring reliability and safety for your electrical distribution needs. It's perfect for spaces such as: outdoor retail shopping centers, corporate campuses, amusement parks, sports fields, hospitality or any outdoor space where power is required.
