Network Integrated Platform Cabinet

Overview

The integrated cabinet is a solution for micro-data center construction, which integrates data center infrastructure products, including cabinet system, UPS power supply system, air conditioning and refrigeration system, dynamic ring system, fire protection system . The integrated cabinet is a solution for micro-data center construction, which integrates data center infrastructure products, including cabinet system, UPS power supply system, air conditioning and refrigeration system, dynamic ring system, fire protection system . Choose from a selection of pre-configured cabinets available in various dimensions, with a portfolio of security and cable management accessories and the option to include our premium airflow management package. Additional accessories can be ordered separately to further tailor to your demands. It offers a highly configurable design with adjustable components and ready-to-ship parts, providing shorter delivery times and faster deployment. The cabinet is constructed with a lightweight, solid aluminum frame, a 3,500 lbs static. For different environments, models are available with various protection ratings such as IP20 or IP55, making them suitable for standard IT environments as well as more demanding industrial applications. Whether you need compact wall-mounted racks for smaller networks or large floor-standing. To meet operators' needs for rapid deployment of MEC, ZTE provides the Common Edge Integrated Cabinet Solution. The integrated cabinet can be used. The more complex and demanding the conditions of your IT infrastructure, the more you require from your server cabinet or networking cabinet. With their outstanding characteristics, nVent's racks connect and protect your IT assets. All our cabinets have been designed to satisfy complex requirements. Fast deployment – SmartCabinet Split provides faster deployment and is ready to use from day one, removing the need to build, construct and design computer rooms which dramatically reduces the required deployment period compared to a traditional IT facility build. Central Management – optional.
