ODF Frame Optical Cable Fixing Bracket

Overview

ODF Optical Distribution Frame, robust steel construction, open frame design for fast and easy access to ODF, 47U fixing positions per 2200mm rack. The ODF is a purpose-made rack designed to accommodate high density Feeder Panels or Splitter Panels used in FTTH PON networks. The ODF System Components. Should accidental eye exposure to laser light be suspected, arrange for an eye examination immediately. © AFL. An optical Distribution Frame (ODF) or patch panel is the starting point for optical cables, most commonly found in rack cabinets in Head End (HE)/Central Office (CO)/Point of Presence (POP)/Data Centre (DC) or smaller cabinets or enclosures. Mainly used in the junction point between the optical transport networks and the optical transmission equipment, or bet een the optical fiber access networks and the user cable. Cross-con-nections and direct connection can be two ways to.
