Optical Network Maintenance Toolkit IK10

Overview

Includes maintenance tools such as a handheld light source, handheld optical power meter, visual fault locator, and cleaning pen; Provides matching standard test jumpers and adapters according to the specific optical network or optical link tested by the customer;Includes maintenance tools such as a handheld light source, handheld optical power meter, visual fault locator, and cleaning pen; Provides matching standard test jumpers and adapters according to the specific optical network or optical link tested by the customer;Operating temperature: -5~40℃; Storage and transportation temperature: -10~40℃; Product list of optical network maintenance toolbox. The boxes can be configured to address a wide range of fiber optic splice and/or connectivity applications for PON, GPON and 5G networks. The engineered design provides IP65. Network maintenance tools are crucial for ensuring system efficiency and minimizing downtime. Discover reliable solutions. These ratings, defined by the IEC 62262 standard, indicate how well a display can resist mechanical impacts in harsh environments. An IK10 display offers the highest protection level, withstanding impacts up to 20 joules, making it ideal for vandal-proof and outdoor HMI applications. An IK09. Our fiber optic termination kits, inspection tools, and cleaning supplies allow both lab and field technicians to complete reliable assembly of fiber optic systems. Our termination kits, for example, are equipped with all of the necessary tools — pin and socket polishing tools, jacket strippers.
