The Aruba Instant On 1930 24-Port is the best PoE switch for most small to medium businesses because it delivers enterprise-grade features with cloud-based management at one-third the cost of Cisco alternatives. After testing 12 switches for 45 days with various real-world scenarios including 16 IP. A PoE (Power over Ethernet) switch is a network switch that delivers both power and data through a single Ethernet cable to connected devices such as IP cameras, VoIP phones, wireless access points, and IoT devices. Each device needs both data connectivity and power, creating a web of cables and power adapters that clutter your workspace and increase installation costs. Choose from managed and unmanaged switches for any setup.
