Spectrometer 264

Overview

Mobile aerosol spectrometer for determining dust mass fractions and particle number size distributions, with or without semivolatile compounds. Designed for both short- and long-term continuous monitoring of dust pollution. We will finalise a price once we receive your enquiry. It is designed for both short and. PR 264 – Pyrrole Red Rubine is a synthetic organic pigment belonging to the diketopyrrolopyrrole (DPP) family, a class of high-performance pigments prized for their exceptional color strength, lightfastness, and chemical durability. PR 264 is characterized by a deep, bluish-red to rubine hue. Icon-driven software and easy-to-use navigation system provide intuitive usability These SP-300 series single-beam spectrophotometers have improved optics resulting in a narrow spectral bandwidth of 5 nm and absorbance range of –0. All models feature measurement modes for absorbance, %. Eco and Pro version to meet all requirements TSP, PM10, PM4, PM2. 5 and pm1 Pro version: Data logger, Wi-Fi, LTE ; USB (type B), Ethernet (TCP/IP), USB flash drive with GRIMM software • Eco version: USB (type B), Ethernet. With the EDM264, GRIMM offers an optimal solution for both short- and long-term, mobile measurements in outdoor areas and at production sites.

Mobile PM monitor GRIMM EDM 264 | DURAG GROUP

Mobile aerosol spectrometer for determining dust mass fractions and particle number size distributions, with or without semivolatile compounds. Designed for both short- and long-term continuous

GRIMM EDM264 Environmental Dust Monitor – Mobile

This mobile aerosol spectrometer determines dust mass fractions and particle number size distribution. It is designed for both short and long-term continuous

Pyrrole Red Rubine: Analyzing Pigment Properties

PR 264 is characterized by a deep, bluish-red to rubine hue, positioned chromatically between bright scarlet pyrrole reds and darker maroon tones such

In-Depth Technical Guide: Photophysical Properties of DPP Red 264

Pigment Red 264, a member of the diketopyrrolopyrrole (DPP) family of high-performance pigments, is increasingly gaining attention in biomedical research due to its exceptional photostability, strong

GRIMM EDM 264 Aerosol Spectrometer | Buy Online

The GRIMM EDM 264 Aerosol Spectrometer offers mobile, real-time measurement of dust mass fractions and particle number size distribution. - Mobile PM and particle counting - Real-time particle

Cole-Parmer SP-300-UV UV/Visible Spectrophotometer; 90 to 264 VAC

One 10 x 10 mm cuvette holder, 100 disposable cuvettes, PC software on CD-ROM, interface cable, and power supply. These SP-300 series single-beam spectrophotometers have improved optics resulting

EDM 264 Stand-Alone Environmental Dust Monitor for Continuous

In wind tunnel testing, the amount of emitted dust was measured using a Grimm aerosol spectrometer. The dust emission potential due to wind erosion was significant- ly influenced by soil texture, vehicle

EDM 264 Stand-Alone Environmental Dust Monitor for Continuous

EDM 264 Stand-alone environmental dust monitor For continuous outdoor measurements Reliable particle sizing and counting Easy installation Ecou0007 and

GRIMM | Mysite

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Built around a 19-inch optical aerosol spectrometer, the EDM 264 offers a unique detection limit and excellent counting efficiency. It features a touchscreen interface with color-guided status information

Datasheet_EDM_264_en dd

EDM 264 Stand-alone environmental dust monitor For continuous outdoor measurements Reliable particle sizing and counting Easy installation Eco and Pro version to meet all requirements

Pyrrole Red Rubine: Analyzing Pigment Properties

PR 264 – pyrrole red rubine This page presents the Spectroscopic analysis of this pigment. The pigment has been examined using XRF spectroscopy, Raman

Single-Cell Mass Spectrometry Reveals Changes in Lipid and

Single-cell analysis performed by imaging mass spectrometry. (a) Raw 264.7 cells are grown on glass microscope slides; multiple growth conditions can be used to examine their influence

MS/MS spectrum of the [M + Na] + ion (m/z 264) from 1n.

Download scientific diagram | MS/MS spectrum of the [M + Na] + ion (m/z 264) from 1n. from publication: Mass Spectrometry Study of Acylthioureas and

Chiral high-performance liquid chromatography of N-octyl

Chiral high-performance liquid chromatography of N-octyl bicycloheptene dicarboximide and confirmatory studies using liquid chromatography-tandem mass spectrometry and two

Scintillation Type Mass Spectrometer Ion Detector

A new and relatively simple type of mass spectrometer ion detector is described. The positive ion is accelerated onto an aluminum surface releasing secondary electrons, and these in turn are

Simultaneous U and Th isotope measurements for U-series dating

Double focussing multi-collector inductively coupled plasma source mass spectrometry (MCICPMS) has become the leading technique in U-series disequilibrium dating and for precise U

Determination of radium and uranium isotopes in natural waters by ...

Determination of radium and uranium isotopes in natural waters by sorption on hydrous manganese dioxide followed by alpha-spectrometry Published: 01 May 2005 Volume 264, pages
