The VIAVI MTS-2000 OTDR with FiberComplete Module is the first method to completely automate all essential fiber-qualification tests, including bidirectional insertion loss (IL), optical return loss (ORL), and optical time domain reflectometry (OTDR), with a single module from a. Time domain reflectometers (TDR) are test devices that generate an energy pulse or step on the cable to determine the location and magnitude of cable faults, breaks, splices, terminations, or other events along the length of a conductive cable. Impedance mismatches cause reflections back to the TDR. The TB6000AV2 from Viavi Solutions Inc. 1 m, Optical Wavelength 850 to 1300 nm, Dynamic Range 16 to 24 dB, Pulse Width 1 ns. More details for TB6000AV2 can be seen below. TB6000AV2 -. Mampaey Engineering is the official distributor for VIAVI which offers the largest portfolio worldwide of optical measurement devices. It.
