Wall-mounted distribution box accessories

Overview

Distribution Boxes, Switch Outlets and Accessories-ArchivOur products range includes simple flush-mounted switch boxes to surface-mounted boxes for indoor.

Key Takeaways

Wall-mounted distribution boxes can be equipped with a variety of accessories including mounting channels, covers, screws, membranes, and IP-rated enclosures to facilitate installation and protection.

Types of Accessories

Mounting and Suspension Accessories Wall-mounted distribution boxes often include internal mounting channels or brackets that allow secure attachment to walls or other surfaces, ensuring stability and proper alignment for electrical components. Covers and Spring Covers Accessories such as spring covers or protective lids are used to shield switch boxes and junction boxes from dust, moisture, and accidental contact. These are available in various diameters (e.g., 60–70mm) and colors, often sold in bulk packs for professional installations.

Screws and Fasteners Specialized screws and fasteners are provided for securing switch boxes, junction boxes, and cavity wall boxes. These ensure a firm installation and compatibility with different wall types, including plaster or cavity walls.

Cavity Wall and Flush-

Mounted Accessories For flush-mounted or cavity wall installations, accessories include press-out membranes, plaster adjustment rings, and windproof cavity wall switch boxes. These components help maintain energy efficiency and provide a neat finish while protecting the internal wiring. IP-Rated Enclosures For installations in wet or humid areas, IP54 or IP65-rated junction boxes are available.

These accessories ensure that the distribution box is protected against dust and water ingress, making them suitable for both indoor and outdoor applications.

Energy-

Efficient and Specialized Components Some accessories, such as junction boxes with membranes, are designed to improve energy efficiency by reducing air leakage and facilitating proper insulation around electrical installations.

Summary

When selecting accessories for wall-mounted distribution boxes, consider the installation environment, IP rating, wall type, and protection requirements. Common accessories include mounting channels, spring covers, screws, press-out membranes, plaster adjustment rings, and IP-rated enclosures, all of which enhance safety, durability, and installation efficiency.
